SUGGESTIONS 
FOR 
SOCIETY BANNERS

Since 1984 local societies have been bringing their banners to display at the FSGS annual conferences.

Banners are usually made of cloth, about 2 x 3 feet, and display the name of the society, symbols, and/or a society motto. Some banners are quilted. Still others are embroidered, appliqued, or textile painted. Be creative!

Banners should be a convenient size to be carried by one person. The society should provide a pole and stand to display their banner during the conference.

You can make a pole from PVC pipe 1" in diameter. The shaft of the pole should be about 72" in length. The horizontal bar across the top of the shaft should be about 5" wider than your banner, with PVC caps at each end and a PVC coupler to attach it to the shaft. The completed banner, with an opening left in the pocket in the top, is to be attached to the cross bar on top of the T.

(You will still need to purchase or make a stand.)

\[
\begin{align*}
\text{Horizontal Bar} & \quad \text{PVC Coupler} \\
\text{Cap} & \quad \text{Cap} \\
\text{Shaft} & \quad 72" \\
\text{Banner} & \quad 36" \text{ wide} \\
& \quad 57" \text{ long}
\end{align*}
\]
